

QUALITY & ENVIRONMENTAL POLICY

Galloplastik S.r.l. aims to produce high quality packaging to protect food and other types of products, responding to specific needs and requested customization. Our activity consists of the design, development and production of highly studied in detail plastic packaging, to ensure freshness, integrity, adequate graphics and food safety. At the same time, the company is committed to developing products with a reduced environmental impact.

Considered the Italian and foreign context in which it operates, the nature of the packaging produced, the environmental impacts resulting from its activities and products Galloplastik S.r.l. has defined the following **quality and environmental policy**.

While pursuing the main purpose - our customers' satisfaction, needs and Galloplastik S.r.l. intends to contribute to a sustainable development through the prevention and mitigation of the potential environmental impacts deriving from our productive activities and the reduction of waste.

MISSION AND WORK METHOD

Our distinctive characteristic on the market and mission is the full satisfaction of our customers with specifically customized products. Galloplastik S.r.l. strives to ensure that production, production and executing lead times are such as to respond in the most appropriate, rapid and effective way to customer requests.

Galloplastik S.r.l. intends to propose itself as a leader in the packaging sector and it always looks for new packaging materials and technologies, both in terms of material efficiency and from an environmental point of view.

Galloplastik S.r.l. thus undertakes to exercise its business **responsibly and jointly** with the protection of the interests of its workers and of the environment where it operates.
